GENERAL

This Timing Tool Set is made for checking / adjusting the engine timing on following models:

Manufacturer	Engine
Lancia	2,0L 20V 5 Cylinder VIS (as of 1996)

SAFETY ADVICE

- DO NOT use the set if any parts are missing or damaged.
- Never lay tools on the vehicle's battery. This may short the terminals together.
- Be careful when working on running engines. Loose clothes, tools and other things can be caught up in revolving parts which may lead to serious injuries.
- Keep children and other unauthorised persons away from the working area.
- Be careful when working on hot engines – risk of burn!
- Remove the ignition key before repair so that the engine will not start unintentionally.
- This manual is just brief information and will not replace a garage handbook.
- Always consult specific service literature for information about torques, assemblies and disassemblies etc.
- After any successful maintenance and before starting the engine, you should rotate the engine for two turns manually to check the new control time.
- Do not use cleaning fluids on belts, sprockets or rollers
- Turn the engine in the normal direction (clockwise unless stated otherwise)

ATTENTION

Do not use setting tools as a counterholder tool when loosening or tightening the camshafts, crankshafts or balance shaft wheels. Use only a holding tool for this purpose, otherwise setting tools or engine components may be damaged.
